Special function cards

60401-001-02	ConfigCard, blank, DESFire
--------------	----------------------------

60500-001-01	LicenseCard Prox (HID Prox, Indala, Keri)
--------------	---

All standard products are available in 2 basic product lines: ISO/MIFARE and LEGIC. LEGIC cards require the reader to use a proprietary RFID frontend chip (LEGIC SM4200) to access their memory. In comparison to ISO/MIFARE, the LEGIC product line cannot support NFC card emulation mode, certain ISO 1593 cards, as well as HID Seos due to incompatibility of the HID iClass SE Processor with the LEGIC frontend chip.
