# Kofax ID Card Reader

## Convenient User Authentication Across Your Print Fleet

Kofax print management software leverages user authentication to enable organizations to gain maximum control and management of their printing while increasing document security and supporting user mobility.

Kofax ID Card Readers are designed and built to make authentication convenient, whether a user is printing at an MFP or using a single-function printer. Nearly all proximity and contactless card technologies are supported, including the popular HID, Indala, Mifare, Legic, iCLASS, iCLASS Seos and MagStripe card types.
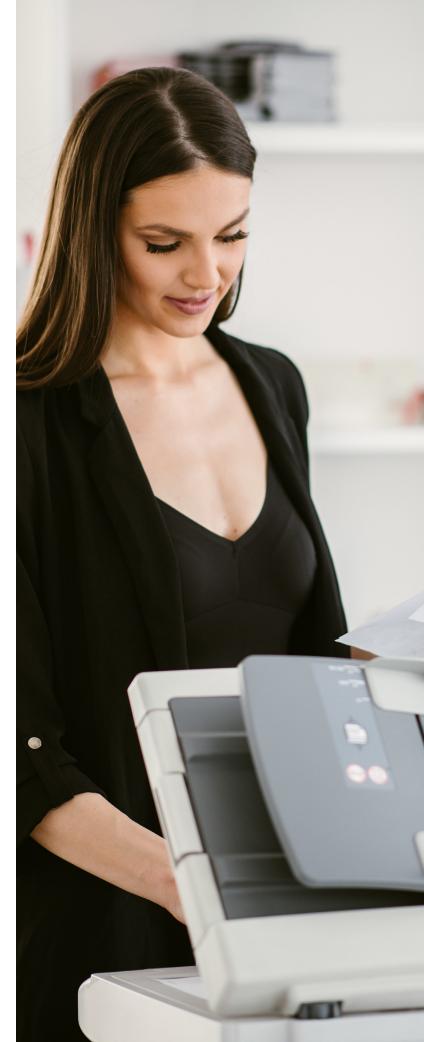

## Multi Format Card Reader

The Kofax ID Card Reader line includes a Multi-Card BC option that can read both 13.56 MHz and 125 kHz frequencies. This reader is designed to support the modern organization that needs to support diverse security standards and handle organizational changes like acquisitions where two card types are in use. With the Multi-Card BC reader, users with varying card types will have full access to the printer or MFP with the convenience of a single reader.

## Why use Kofax ID Card Readers?

Kofax ID Card Readers are designed specifically to work with Kofax print management software. They have been rigorously tested on embedded software across all supported devices from Canon, Fuji Xerox, HP, Lexmark, Ricoh, Samsung, Sharp and Xerox.
